Our services: Full structural design
Establishing the basis
Preliminary design
Final design
Approval documentation
Execution drawings
Preparation of contract award
Construction supervision

Brief description: New building of a healthcare centre
- 2-storey reinforced concrete structure
- stiffening core of reinforced concrete
- vertical structural elements not upon each other, thus difficult load transfer
- outer walls made of large sized assembly units as sandwich construction
- wooden ceilings made of nail-laminated timber

Completion: 2005
