Value Engineering

Brief description: Alteration of a large event shopping centre, in particular the new construction of a steel and glass hall

- elliptical glass and steel hall 60 m x 30 m
- two promenades with large openings in the roofs: circular and elliptical glass light cupolas
- filigree steel construction
- steel construction for event mall roof domes consisting of two rotundas and a small event mall
- steel construction of smaller event mall measuring 32 m in length, 20 m in width and 7 m in height
- steel roof of rotundas consisting of a cupola with a diameter of 18 m and a rise of 4 m with a glass tip fitted on top
- modular design for optimised assembly

Completion: 2006
